FIG. 3

FIG. 4

The diagram illustrates a vertical air flow system. On the left, a vertical tube (11) is connected to a base and contains a series of circular and rectangular components (10, 12, 13, 15, 16). Air (AIR) flows downwards through the tube. On the right, a cross-sectional view of a component (20) shows air (AIR) flowing horizontally through it. A label 50 points to the top of the vertical tube, and 51 points to the tube itself.
